

AutoShack Weekly Tip

ASWTJanuary272019

TRANSMISSION (GEARBOX) FLUID FLUSH

- Transmission fluid lubricates and cools down your transmission.
- In automatic transmissions, it also transmits power.
- It is recommended that you flush your transmission every 30,000 to 60,000 miles-roughly every 3 to 5 years.
- Transmission fluid flush involves draining your old fluid from the gearbox, washing out the gearbox and filling it with fresh fluid.
- Performing a flush properly helps to improve transmission performance and extends the life of the transmission.
