

# AutoShack Weekly Tip

## AVOIDING PART CHANGERS

- When your car develops a fault, it is not uncommon to go through several iterations of changing parts based on your mechanic's advice without solving the problem.
- Throwing parts at the problem can quickly become a useless expensive venture.
- Get more involved in your vehicle diagnosis by taking a few minutes on the Internet to read about your symptoms and asking your mechanic more informed questions.
- This can help you figure out if your mechanic is trying to solve the problem systematically or just throwing parts at the problem.
